SECURITY HOLDING - 2 YEARS THE LEADER OF THE
PRIVATE SECURITY INDUSTRY IN THE NATIONAL
BUSINESS RATING

DEAR CUSTOMERS, PARTNERS, COLLEAGUES AND FRIENDS

"SECURITY HOLDING" was created in March 2012. Today, we are one of the most dynamic and constantly developing security companies in Ukraine. According to the criteria of the scope of service provision, today we cover about 15% of the Ukrainian market. The enterprise has a very developed own material base, as well as a complete package of permit documents for the provision of various security services.

The company's greatest asset is employees. Most employees have long working experience in security, law enforcement and paramilitary structures.

We, as one of the leaders in the field of security, aware of the extent of our responsibility to the customers, add all our efforts, knowledge and experience so that the results of our activities become a model of quality of fulfillment of obligations. By expanding geography and range of activities, we improve the terms of cooperation. "SECURITY HOLDING" gathers the necessary experience, which allows us to receive high-quality services not only for our regular clients, but also for the steadily increasing number of new ones.

We are grateful for the fact that our company is growing and developing. Thanks to you we are encouraged to partners and friends, providing the most valuable, which can be in any way - your trust. The highest value for us is your desire to be our regular customers, partners and friends.

General Director of LLC
"SECURITY HOLDING"
Moskalenko O.V.

MISSION OF COMPANY:

Our company is created to provide one of the basic human needs - a sense of security. We combine accumulated experience, professionalism and modern technology to give our customers a sense of calm and confidence, improve quality of life and prevent danger.

PROFESSIONALISM. We pay great attention to the professional training of our employees. We have highly skilled professionals with a great experience. We train employees in our own training center.

OPERATIONALITY. Our company has developed an effective practice of receiving protection, in the shortest possible time, from large industrial enterprises to small objects, without disturbing the production process.

RESPONSIBILITY. In accordance with the contracts of guardianship, we bear the full financial liability for protected property. Under the contracts of voluntary liability insurance, compensation is provided for up to 10 million UAH. in favor of owners of objects of protection caused by improper provision of security services.

LEGALITY. All types of security services are provided with strict observance of the norms of the current legislation of Ukraine, on the basis of issued licenses and permits.

OUR SERVICES:

Our specialists work in quality, and in the shortest possible time, on design, installation and maintenance systems of any complexity.

**FOR YOUR FAMILY
AND BUSINESS**

- ✓ Housing protection
- ✓ Business protection
- ✓ Physical protection
- ✓ Technical protection
- ✓ Technical protection of information
- ✓ Satellite monitoring
- ✓ Fire protection systems
- ✓ Construction and repair works

WHY YOU SHOULD ORDER SERVICES WITH US?

Use of the latest technologies of protection

Flexible pricing with high quality services

Minimizing customer costs for security

The shortest terms for taking the object under protection

WE ALWAYS STRIVE TO OPTIMIZE CUSTOMER SPENDING ON SECURITY

The company is created by a team of security professionals. Our employees are one of the most competent and experienced specialists in the field of protection.

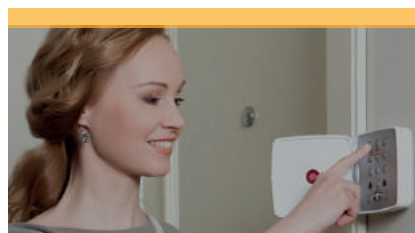

More than **2500**
SUCCESSFULLY IMPLEMENTED
PROJECTS CONFIRM THIS!

HOUSING PROTECTION

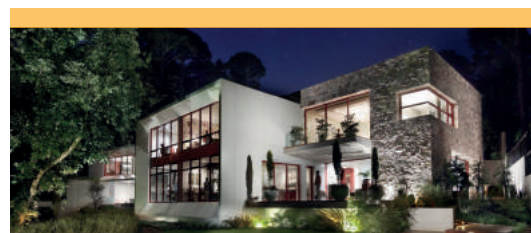

Housing protection is a task to perform that requires experienced professionals. Enterprise "SECURITY HOLDING" and security partners will carry out all necessary work on installation of equipment quickly and qualitatively. Set alarm - a solution that guarantees peace.

APARTMENT PROTECTION

COTTAGES PROTECTION

PRIVATE HOUSES PROTECTION

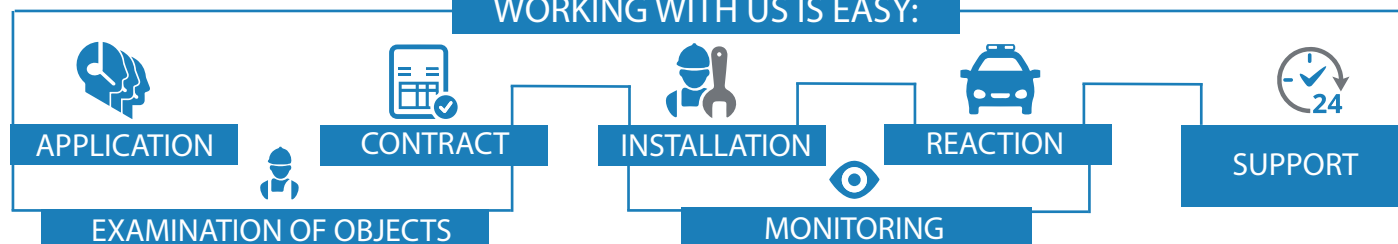

At your request, we will be able to pick up the necessary security equipment of reliable manufacturers for your home, qualified to carry out installation and connect to your own central monitoring panel. All works will be carried out in a short time and at an optimum price (the cost is fully justified). Our specialists have the necessary qualifications and have extensive experience in this field. Even if the alarm system for the apartment is already mounted, we can connect it to our security guard.

BUSINESS PROTECTION

Our company has considerable experience in the organization of protection of large enterprises. Due to the high level of training, experts in a short time will conduct a survey of the object and offer an optimal protection scheme, skillfully combining the benefits of physical and technical protection of an enterprise of any complexity. All employees have successfully completed the required training and have the appropriate certificates and permissions. The use of high-tech equipment to protect the premises of leading domestic and global manufacturers can achieve the desired level of safety. We offer affordable and quality services in all cities of Ukraine.

WORKING WITH US IS EASY:

You can order installation of the system on the site and get advice by contacting us by phone or by visiting our office. Customer support professionals will answer all the questions and provide a qualified consultation.

PHYSICAL PROTECTION

Each organization is trying to ensure the maximum conservation of material values. However, not all enterprises are capable of creating adequate physical protection of objects on their own. Now you do not need to carry out an independent selection of personnel, since the company "SECURITY HOLDING" provides physical security services. We are distinguished by many years of experience, a high level of qualifications of employees who regularly go through the necessary training, and an individual approach to solving problems of any complexity. Brief terms for taking the guard, optimal control scheme, a favorable price.

OUR SERVICES:

- Protection of stationary objects:
 - Patrolling of territories
 - Organization and control of the throughput and intraregional regime
 - Use of service dogs for the protection of objects
 - Discovery, prevention and elimination of unlawful acts, thefts, theft, material damage
- Organization of personal safety of clients
- 24-hours operational response
- Support of persons with material values
- Guard and support of goods

FEATURES OF WORK:

The high level of training of specialists, the availability of special equipment and traumatic means, the use of work dogs can provide a high level of protection. Due to the physical observation of the object, it is possible to prevent many offenses and create safe working conditions for staff and visitors. The cost of providing services is another competitive advantage of the company.

"SECURITY HOLDING" - one of the few companies in Ukraine, which is financially responsible to customers. The risks of customers are insured for up to 10 million UAH, which is an additional guarantee of conscientious fulfillment of the tasks.

PROTECTION AND SUPPORT OF CARGOES

The company carries out the protection of goods transported by rail, sea and road transport. You can be sure of high reliability and reasonable price for service delivery. Before you can arrange a contract for the security of goods, consider the list of services provided by the terms of this contract.

- Receiving cargo from the customer
- Controlling the weight of commodity values
- A thorough inspection of the condition of the vehicles in which the goods will be transported
- Control of seals and seals
- Delivery of goods to the recipient

WHAT SERVICES ARE INCLUDED ?

Any data are confidential and not disclosed to third parties. Employees engaged in maintenance and protection of cargo, provide such information to authorized persons only after verification of documents.

We provide the highest level of security, because the company's employees have the necessary skills and are equipped with special means of defense. The use of technical innovations is an additional factor aimed at the reliable protection of the cargo.

PROTECTION OF MASS EVENTS

ARE YOU PLANNING A LARGE EVENT AND EXPECTING A LARGE NUMBER OF GUESTS?

We will be able to help you. "SECURITY HOLDING" will carry all the nuances of the organization of the protection of your event: from the study of the object of protection and discussion with the client of all requirements for the optimal arrangement of our forces and means. The protection of mass events will be carried out at the highest level, and the price offer will pleasantly surprise you.

In our company protection is carried out only by highly skilled specialists who have passed the relevant training and have the necessary documents of a state standard. All of them are equipped with special means of active defense, traumatic weapons, communications, able to make non-standard decisions, to act correctly and, at the same time, resolutely.

WE GUARD:

charity events, business meetings, professional conferences, banquets, secular receptions, sports competitions, international meetings, fairs, exhibitions, presentations of new products.

The protection of mass events guarantees the full safety of all present. You can be sure that the planned event will be without excesses and focus only on the intricacies of its conduct.

ORGANIZATION OF PERSONAL CLIENTS SECURITY

More recently, the profession of personal guard has caused a lot of surprise, but today the need for services of this kind is constantly increasing. About a decade ago, protection was mostly required by celebrities. Now personal guard is a necessity for many businessmen, deputies, judges, members of their families and just ordinary citizens who for some reason need protection. Specialists of the "SECURITY HOLDING" company are able to satisfy the requirements of the most demanding client. The team of professionals will provide the highest level of security everywhere, eliminating the potential danger.

A CLEAR UNDERSTANDING OF FUNCTIONS IS A GUARANTEE OF MAXIMUM REALIZATION OF NEEDS

The key task of a first-rate personal guard is to eliminate the potential threat to the life and health of the client before the first manifestations of danger. Employees of the "SECURITY HOLDING" company understand this well and will not risk once again, exposing the client to danger.

THE DUTIES OF A PERSONAL GUARD ARE INCLUDED:

- Customer support 24 hours a day, 7 days a week
- Creating safe routes for moving
- Control over the personnel and visitors of the customer
- Restricting the access of third parties to the client
- Checking the security of the places that the customer visits
- Detection and instant blocking of threats

Along with personal security personnel, you can travel freely or rest in a certain place without worrying about a sudden attack.

CYNOLOGICAL SERVICE

"SECURITY HOLDING" created a system of own kennels of official dog breeding. Among the breeds that are brought out in nurseries are German, Central Asian and Caucasian Shepherd dogs, a variety of nuts, rottweiler. The elite breeds of our kennel dogs annually hold prize-winning places in international tournaments.

The introduction of one cynological post can reduce the cost of maintaining the protection of approximately 11 times (from 220 000 to 20 000 UAH / year).

CENTRALIZED (REMOTE CONTROL) SECURITY

The company "SECURITY HOLDING" uses only modern equipment from leading domestic and foreign manufacturers to equip the control panel. That is why our customers can not doubt the perfection of the equipment - it promptly warns the employees of "SECURITY HOLDING" about uninvited guests, with the help of the means of the CSS, and will enable to prevent the offense.

TRAINING OF SPECIALISTS - QUESTION NUMBER 1

The enterprise carries out a thorough selection of employees. All of them:

- have the appropriate qualification;
- regular training;
- have a great physical shape.

The high level of education of technical workers, together with the availability of modern equipment, provides reliable protection. Almost 60 rapid reaction teams, composed of professional staff, are located throughout Ukraine. The established mechanisms of operation allow "SECURITY HOLDING" to set reasonable prices for the provision of remote control services.

HOW THE SECURITY OF YOUR OBJECT WILL BE CARRIED OUT?

GETTING AN ALARM

Operators of the monitoring station monitor the object 24-hours. Communication channels are duplicated, so the signal will arrive even if it is deliberately blocked by malicious people. The equipment regularly performs self-diagnostics and works even in the absence of electricity supply

INSTANTLY DIRECT THE RESPONSE GROUP

The operator promptly sends a quick response group and alerts you to a call

WE ARRIVE AS SOON AS POSSIBLE

Average crew arrival time is 5-7 minutes

Installing a security alarm is a simple and reliable way to protect your property from intruders.

MAIN BASIC EQUIPMENTS FOR SECURITY AND HOME PROTECTION

1. SECURITY DEVICE

Device for transmitting alarm and service signals to the central monitoring station.

2. MOTION SENSOR

It reacts to the thermal radiation of a person who moves and sends an alarm to the Central monitoring station. Not responding to pets..

3. SENSOR OPENING

In the case of opening the door, sends an alarm to the control panel of the security device.

4. KEYBOARD

Compact device for placing and removing an object from security by entering a personal code.

5. WIRELESS ALARM BUTTON

Designed for instant activation of anxiety.

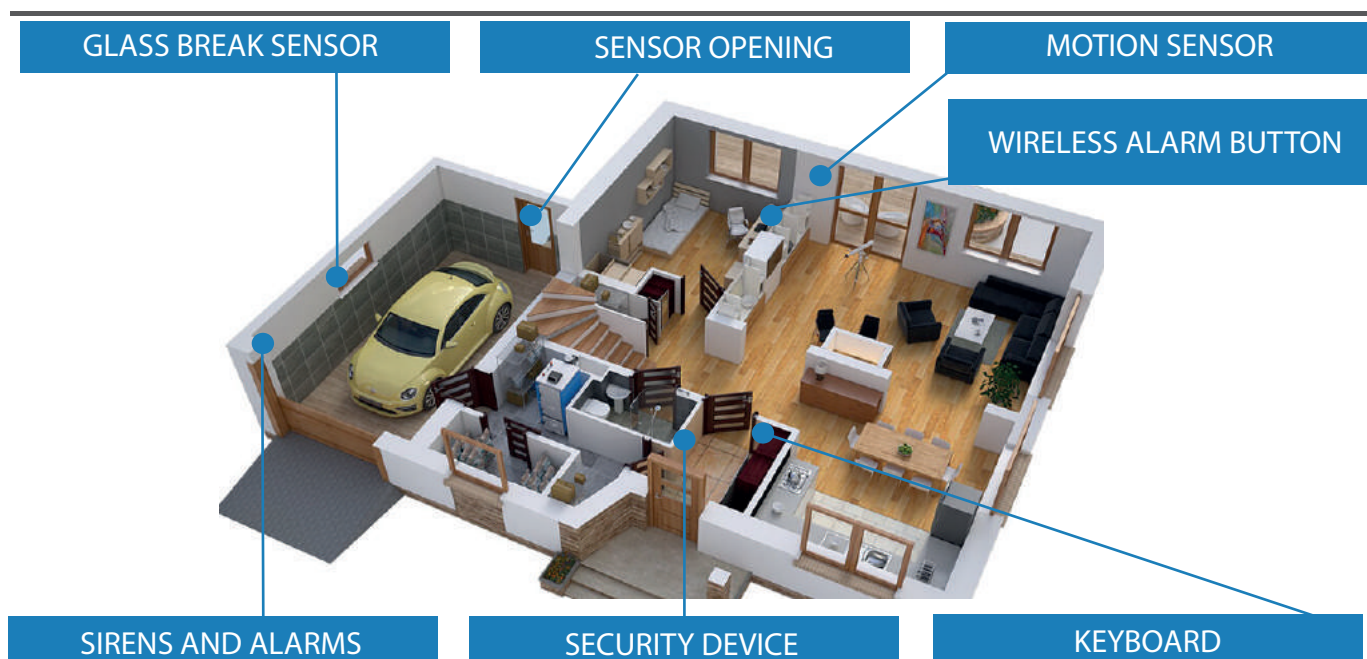

6. GLASS BREAK SENSOR

When opening the door / window, sends an alarm signal to the control panel.

7. SIRENS AND ALARMS

Designed to provide a sound signal in the systems of fire, security and fire and security alarm systems. They are installed indoors heating and non-heating type.

SCHEMATIC LOCATION OF SECURITY DEVICES, AS WELL AS SPECIFIC POINTS, WHERE EXACTLY THEY WILL BE LOCATED

The growth of crime that threatens business development, as well as an increasing expression of concern for their own property, has led to the need for its permanent and guaranteed protection. The access control system is an integral part of the integrated security equipment. It is aimed at:

- protecting against unwanted intrusions
- tracking the movement of people
- monitoring situations on the object

FUNCTIONS OF THE CONTROL AND ACCESS CONTROL SYSTEM

In addition to its main function - to allow or deny access to a guarded building - system provides other possibilities.

AMONG THEM ARE THE FOLLOWING

- Accounting of working time of employees, which will definitely increase the work discipline at the enterprise.
- Fixation of motor transport (fact, time of travel, duration of parking).
- Improving the appearance of the passage or other control site.
- Presence of a modern turnstile will increase your rating in the eyes of clients and partners than the watch at the entrance.
- Ability to centrally manage multiple processes on an object
- Ability to combine with other security systems (video surveillance, security or fire alarm)

Access control system is installed taking into account all the features to adapt it to the client's enterprise. Our firm, in the person of professional staff, cares about the fact that access control systems have always justified their value.

AREAS OF APPLICATION AND THE PRINCIPLE OF WORK OF ACCESS CONTROL SYSTEMS:

can be located in offices, business centers, industrial enterprises, warehouses, educational establishments, on any security facilities where security is provided.

We offer the widest selection of all elements of control and access control systems. The configuration can be selected individually. Today, ACCESS CONTROL SYSTEMS at enterprises and institutions is a necessary security measure, the price of which is comparable to the benefits.

THE ACCESS CONTROL SYSTEMS CONSISTS OF THE FOLLOWING ELEMENTS:

USER ID. This is a pass in the form of cards, key rings, etc., which allows you to pass the control point;

READER. Device that transmits information from an identifier;

CONTROLLER. It can be standalone or networked. Analyzes the resulting code, then decides whether to allow or refuse to skip;

EXECUTIVE DEVICE. It is used in the form of electromechanical and magnetic locks, turnstiles, barriers and other.

Access control follows the following algorithm: the employee submits his personal identifier to the field of action of the reader. Based on the information received, the controller allows the input, or blocks it. In any case, the action is memorized by the system. Unauthorized penetration will sound an alarm signal.

If you want the access control system to be installed successfully in any region of the country, use the services provided by our company.

VIDEO SURVEILLANCE

Shops, offices and large-scale enterprises significantly complicate the process of supervising compliance. Modern video surveillance systems are an indispensable helper in the fight against malicious people. While the physical presence of the security guard at the facility can not provide continuous surveillance, the "invisible eye" of the camera will quickly identify the offender, and security guards will not allow him to quietly leave the crime scene. Video cameras for video surveillance give an opportunity to react promptly to illegal actions, which helps to prevent violations and the development of problem situations.

WHAT IS NEEDED FOR EFFECTIVE SUPERVISION?

In order for the installation of the video surveillance system to produce the necessary results, it is important to observe the rules for installing the equipment. The engineers of our company are highly skilled specialists with many years of experience in the field of implementation of technical security systems.

WHAT TO CONSIDER WHEN INSTALLING A VIDEO SURVEILLANCE SYSTEM?

- Technological and topographic properties of the object.
- Daytime and night lighting.
- Optimal specifications of video cameras and CCTV systems in general.
- Information storage device, server hardware type, and archive video depth.
- The need to integrate with other integrated systems of technical security.

Our company offers services in design, installation and maintenance of systems of digital and analog video surveillance. We will be able to integrate these systems into an already existing client security system. "SECURITY HOLDING" has all the necessary permissions and licenses for carrying out such work. We install only high-quality, certified equipment from leading domestic and foreign manufacturers. Our company will be able to offer the optimal system, which is designed taking into account all the features of your particular object.

The cost of our services is quite acceptable, and the quality of work is perfect. "SECURITY HOLDING" guarantees the creation of a quality video surveillance system.

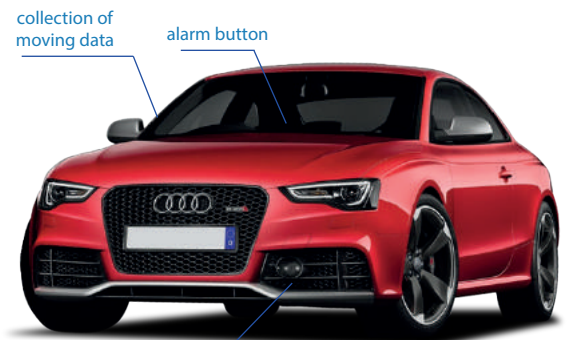

Installation of video cameras occurs only after careful study of the object. It is then that the employees will offer concrete proposals to the customer and conclude a cooperation agreement.

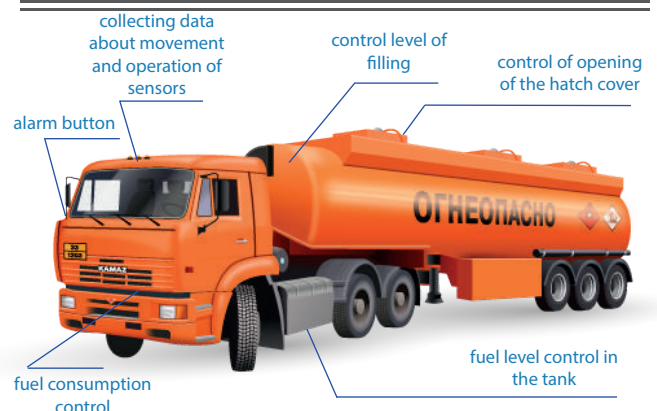

The vehicle is equipped with navigation equipment, which, based on signals from satellites of GPS systems and Glonass, determines the location, speed and direction of travel. In addition, equipment for data collection can be installed, namely: FLS - fuel level sensors, flow meters, fuel columns, temperature sensors, RFID / 1-wire equipment, electronic locks or even surveillance cameras; It is also possible to connect to the work vehicles of the vehicle and on-board computer car (Can / Fms) in order to read their parameters, or even their management. The collected data, via GSM / GPRS network, are transmitted to the server, and to the operator's work place. This data is displayed in a special program on the map, and through the system of reports, which can also be adapted to the requirements of the user. If necessary, satellite monitoring data can also be used in the system of economic and accounting, which will be processed and will be placed on the corresponding accounts of the accounting system.

WHAT IS THE SYSTEM FOR TRANSPORT CONTROL?

- On-board navigation equipment - GPS - tracker
- Fuel level sensors
- Fuel consumption sensors - flowmeters
- Units of fuel accounting - mobile / stationary fuel columns
- User identification tools (RFID cards, 1-WIRE keys)
- Additional sensors (temperature, weight, etc.)
- Wired and wireless alarm buttons
- Specialized software

lockout function in case of theft

POSSIBILITY OF CONNECTING EXISTING AND NEW GPS - EQUIPMENT WITHIN ONE APPARATUS AND SOFTWARE COMPLEX. INTEGRATION OF VECTOR MAP OF COMPANY AND FILLING OF REPORTS OF INFORMATION FROM THEM.

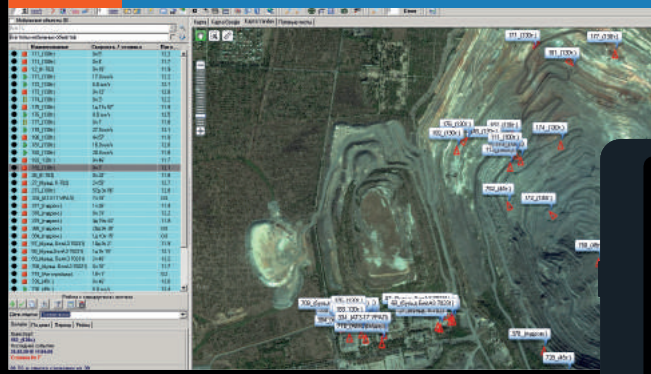

FEATURES OF THE SATELLITE MONITORING SYSTEM

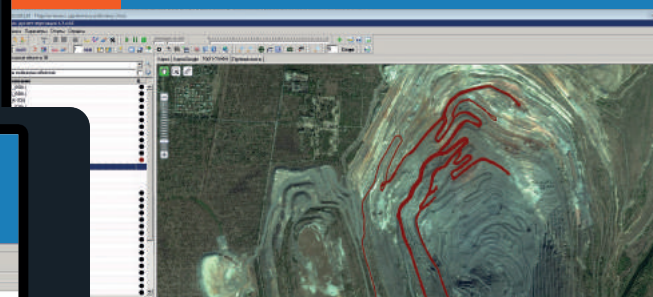

- Determine the location of vehicles on a map in real time
- Control of actual mileage of individual vehicles
- Determination of the duration and place of their parking
- Determination of the rate of fuel consumption in each area of traffic, control of fueling and detection of unauthorized fuel discharging
- Determination of unauthorized fueling from a fuel card
- Control of real run
- Database maintenance for drivers, vehicles
- Export reports in Microsoft Excel format Google Maps, OSM, Visicom, Luxena, Detailed Vector Cards (GIS)
- Data archiving and retrieval: a database of drivers and vehicles, travel, fuel, and more
- Ability to remotely stop the engine with the help of SMS
- Availability of the system of active messages and parameter control, user monitoring
- Automation of the monitoring process
- Software development according to user requirements
- Modularity of the system allows adding or removing components of the system, taking into account the individual needs of a particular customer, due to which the product price is optimal.
- The ability to combine the key performance indicators of transport in one graph for better analysis
- Control the engine load, and fuel consumption by the engine
- Additional algorithms for optimizing fuel level control, without losing the quality of data, allow to lower the threshold of fuel leakage, which is automatically detected by the system
- Application of flowmeters, and the possibility of their application for accounting
- Possibility to combine old and new equipment into a single system. High speed of reports creation over long periods of time
- Consolidated reports across the fleet allow you to minimize the time of data analysis across the vehicle fleet.
- Practical experience in the development of integration systems for enterprise accounting and automation of transport accounting (1C, SAP, CIS, etc.)

TECHNICAL PROTECTION OF INFORMATION

Information security is one of the main condition for the normal operation and development of any enterprise system, and can also reduce the prospect of data loss. Therefore, each manager understands the importance of maintaining confidential information, regardless of how high the price of the service is. Possible risks from "leakage" of confidential information are even hard to predict

OUR SERVICES:

- Identification indoors and technical means of electronic devices
- Finding hidden cameras and radiations from hidden systems of video surveillance
- Search for hidden devices with the transmission of information in the radio and optical range, infrared channel
- Scanning of leading lines of various purposes: power supply networks, telephone communications, fire and security alarms for the purpose of detecting mortgages

THE ENTERPRISE PROVIDES SERVICES IN PREPARATION AND TECHNICAL SUPPORT OF CONFIDENTIAL NEGOTIATIONS AT AN AFFORDABLE PRICE

- Survey of the place of negotiations in organizations to identify potential sources of information leakage;
- Scan radio during negotiations to identify technical means of data loss. The listening detector is used with full assurance of the confidentiality of the information discussed.

Our company covers the whole range of solutions and procedures for building effective control of any threats to corporate information security - from auditing existing security and consulting systems to their development, to creating complex solutions for managing and ensuring compliance with the requirements of the governing bodies.

NO SECURITY FIRM HAS SUCH A LARGE STAFF OF PROFESSIONAL STAFF WITH STATE-OF-THE-ART CERTIFICATED EQUIPMENT. INFORMATION SECURITY, THE DELIVERY OF WHICH YOU CAN ORDER FROM US - IS GUARANTEED SUCCESS IN TERMS OF CONFIDENTIALITY AT THE APPROPRIATE COST.

AUTOMATIC FIRE PROTECTION SYSTEMS

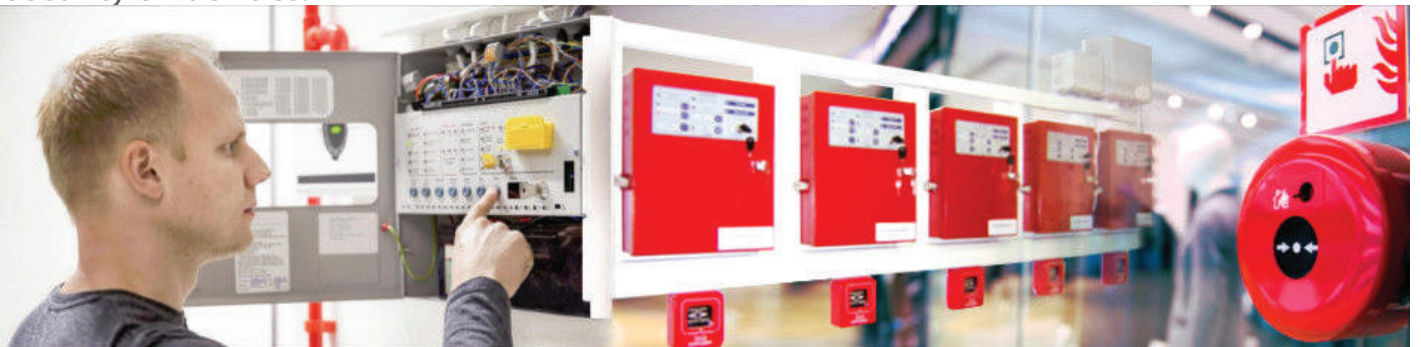

Modern buildings and offices contain a huge amount of electrical appliances and other engineering equipment. All of them - are potentially fire hazardous. The provision of fire protection is carried out at the design stage, which greatly facilitates the work of specialists and reduces the cost of systems. Therefore, an optimal solution for you will be an appeal to our services already at this stage. In this case, the specialists of our company will consider, during the design of the fire protection system, all the architectural and technological features of the building, which will create the maximum safe conditions on the site.

OUR SERVICES:

- Installation, maintenance of operational suitability (maintenance) of fire extinguishing systems (water, foam, gas, powder, aerosol)
- Installation, maintenance of operational suitability (maintenance) of fire alarm systems, fire alarms and evacuation management of people, equipment for transmitting alarms
- Caution on fire protection systems
- Fire protection (fire retardant deep or superficial, fire protection (painting, plastering, winding, facing), fireproof filling)

In those situations where our customers whose objects already have old fire protection systems in place, our specialists can repair, partially or completely replace such equipment. In various cases, the services of "SECURITY HOLDING" will provide the maximum possible security of facilities.

Before the installation of security and fire alarm systems, our experts go to the object to determine the degree of fire risk and vulnerability to unauthorized access. Based on the collected data, specific requirements are set up, which should be consistent with the security and fire alarm systems at this facility.
